SUMMARY

Experienced Senior Software Engineer with a robust background in software design, development, and team management. Proficient in Python and Node.js, demonstrated expertise in building AWS Lambda packages, developing microservices using Django and FastAPI, and deploying machine learning models on airflow. Proven leadership skills in managing a team of 4 developers across multiple roles, driving Sprint planning, and contributing to SaaS platforms. Holds a Master's in Machine Learning and Artificial Intelligence and a Postgraduate Certificate in the same from IIIT Bangalore. Possesses strong skills in architecture design, RESTful web services, and a comprehensive toolset including Git, Docker, and various AWS services. Bringing 9+ years of valuable industry experience.

PROFESSIONAL EXPERIENCE

Backend Developer - 2 (SDE-3)

Feb '24 - Present

Sequoia Group

Bengaluru, IN

we are building product in HRMS domain

Software Development and design

- Stream line the development, deployment, version control management and requirement gathering process
- Executed the transition from monolithic code to microservices architecture utilizing **containerization** technology, microservices frameworks, and cloud services to enhance service management, scalability, and deployment simplicity of DAP repository
- Optimized existing APIs from 30-40 sec to 1-3 sec by eliminating unnecessary I/O operations, database lookups, and **fine-tuning facets, projections, and indexing**
- Developed a Notification service for In app and email notification using **AWS SNS**, resulting in the efficient streamlining of communication processes
- Developed new feature to meet the business requirement, like candidate offer budget calculation, backfill position management
- Enhanced greenhouse efficiency by reducing manual tasks by 50% and **improving candidate tracking metrics through the development of a RESTful API for ATS integration with Greenhouse using Python**

Tech-stack: FastApi, python3, docker, aws ecs, mongodb

Senior Software Engineer 2

May '21 - Feb '24

Hypersonix

Bengaluru, IN

Software Design & Development

- Built and deployed AWS **Lambda** package in python to create user, user **policy**, setup lambda, s3 bucket, add events to trigger lambda with s3 put/delete operation and create a table allocated to the user
- Creating & installing software solutions and developing **high-quality** software design and architecture
- Providing solutions by determining and designing system specifications, standards, and **programming** via python
- Developed POC for **Churn** and **RFM** model using classical machine learning approach
- Created several **microservices** from scratch using **Django** and **FastAPI**, with deployment set up via Docker in local and EKS on production
- Contributed to building a **SaaS** platform for solving business problems such as **sales**, demand, and **price optimisation**
- Built **event driven** micro services using **kafka**, **FastApi** to push prices changes to multiple platforms

Tools: FastAPI, Kafka, airflow, docker, python, snowflake, postgres

Team Management

- Manage Team of 4 developers
- Gathering** the requirements from product and create Jira ticket **assign** to developers depending on there caliber
- Creating stories and driving Sprint planning

Senior Software Engineering

Apr '20 - May '21

Paytm Insurance

Mumbai, IN

- Wrote clean and dynamic code, leveraging expertise across **multiple programming languages** to meet diverse requirements.
- Provided **Framework** for Insurer's **API Integration** to Paytm insurance Platform using **Kotlin**

Tools: Node.js, Kotlin, python, data-structures, Algo and system design

Software Engineering

Sep '18 - Feb '20

Coverfox

Mumbai, IN

- Integrated insure's API to Coverfox Platform
- Worked on in-house **CRM** to add renewal business and optimised 90%

- Worked on code separation from **monolithic** codebase into small **microservices** and implementation of communication using rest API
- Worked on integration of **Recommendation Engine** to suggest best health basis demography, medical condition, and lifestyle
- Explored **docker**, AWS **container** service, git-lab pre-commit script

Tools: python, django, docker, microservices, aws

Software Engineering

May '17 - Sep '18

Ardentia Technologies pvt ltd

Mumbai, IN

- Optimised SQL query running on AWS **Redshift**
- Written ETL job in python and deployed on EC2 server
- Worked Apache airflow and implanted using python
- Worked as growth hacker to explore AWS services
- Written end to end process to download file from s3, cleaning, processing, copying it into Redshift. Then running insert SQL using python on Redshift to move it from staging to dimension and FCT tables

Tools: python, redshift, lambda, ec2, glue, s3, aws services

FM Engineering

Feb '16 - May '17

Redknee

Mumbai, IN

- Worked on finding solutions to assigned tickets by analyzing CDR logs.
- Wrote shell scripts for processing CDR logs and automating network device health checks
- Automated the process for reconciliation using shell scripting

Tools: unix shell scripts, networking, system health check, Monitoring

SKILLS

Programming Languages: Python, Node.js

Verson Control: Git, Git Hub, GitLab

Database: My SQL, MS SQL Server, Postgres, snowflake, Redshift, NoSQL DBs like DynamoDB and Mongo DB

Web/Application Servers: Apache, Nginx, Docker

Server Tools: Redis, Cassandra, Git, KAFKA, MongoDB

FrameWork: Django, Flask, FastApi

AWS services: S3, lambda EC2, SNS, Elastic beanstalk, SQS, Redshift

Software Development & Testing, Rest APIs Development , Unit Testing, Cross-Vertical Team Leadership, Coding & Troubleshooting

Architecture Design, RESTful web services, Data Structures and Algorithm

EDUCATION

Master of Science in Machine Learning and Artificial Intelligence

Sep '21 - Aug '23

Liverpool John Moores University

Liverpool, UK

PG Diploma in Machine Learning and Artificial Intelligence

Sep '21 - Sep '22

IIIT Bangalore & upGrad

Bengaluru, IN

B.E. in Electronic and Telecommunication

May '11 - May '15

Mumbai University

Mumbai, IN
